THE DECO CASSETTE SYSTEM
LOCATION PROVED FOR DEPENDABILITY AND

Simplest conversion available.
In just minutes a micro cassette tape programs your new game into the master system.
It only takes a total of 10 minutes to change the Cassette Tape, Key Module, Top Flash, and controls (if necessary) — a completely new game in 10 minutes!

Your game kit includes:
- Micro Cassette Tape
- Key Module
- Top Flash
- Instructions

The many dip switch options allow you to program your game for any kind of site.

Available at a fraction of the cost of a new conventional game, and so simple to install. Below are the simple steps. Once the tape has stopped, the system is ready for your customers to play. The tape is not used again until you start up the next day. The tape is only used three minutes per day to program the game into the system. The rest of the time it remains dormant.

There will be no confusion over player controls either. The player control panel is specially designed to adapt to the needs of each game without losing its play simplicity, nor having its appearance mutilated with repeated additions.

Not only are you making a sensible longterm investment when you buy your master cabinet, but with the Deco Cassette System you are also investing in enormous savings in transportation and man hours.

video games system that lets you new games — not new cabinets.

The Deco Cassette System Comes of Age

Data East offers a proven system that has been fully tested in the international marketplace. Although revolutionary, it is no longer an untested, unknown system. It is a system that has been in use, taken all the knocks, and survived as a tough package that can give you high profits. Add to this the great variety of games already available, and a continuing game development program that assures you of ample new games for the future, and you have an exciting package.
